

Ocean Radar - data currently available via the portal

Data summary - Radials - report run on Thursday 31 August 2017

Headers:	Type of data file (i.e. QC vs. non-QC).
Sub-header:	Location of radar site.
Start:	Transmission start date (format: dd/mm/yyyy).
End:	Date at which the last file was received (format: dd/mm/yyyy).
# years of data:	Number of years between the transmission start date and the date at which the last file was received.
% coverage:	Total number of files as a percentage of the total number of files expected (i.e. % coverage = Total number of radial files received/Total number of radial files expected x 100)
Ocean Radar:	http://imos.org.au/oceanradar.html .
