

National Mooring Network Passive Acoustic Observatories - data currently available via the portal

Data summary - report run on Monday 08 January 2018

Headers:	Names of acoustic observatories.
# loggers:	Total number of loggers deployed.
# loggers with good data:	Total number of loggers that successfully obtained 6kHz recordings.
# loggers with clock sync data:	Number of loggers that obtained 22kHz recordings (used for synchronising clocks between loggers).
# sets on Acoustic Viewer:	Total number of datasets accessible via the IMOS Acoustic Data Viewer.
Start:	First deployment start date (format: dd/mm/yyyy).
End:	Last deployment end date (format: dd/mm/yyyy).
# days of data:	Number of days between the first deployment start and the last deployment end date.
National Mooring Network:	http://imos.org.au/nationalmooringnetwork.html .
Acoustic Observatories:	http://imos.org.au/acousticobservatories.html .
IMOS Acoustic Data Viewer:	http://acoustic.aodn.org.au/acoustic/ .
