

**IMOS is an initiative of the Australian Government being conducted as part of the National Collaborative Research Infrastructure Strategy**

## **Australian Acoustic Tagging and Monitoring System (AATAMS)**

# **Final Report following the use of AATAMS VR2W receivers**

### **1. Project title**

### **2. Authors**

### **3. Project summary**

(as stated in your application form)

### **4. Project aims**

(as stated in your application form)

### **5. Level of achievement**

(for each aim, provide information on the level of achievement justifying why some aims might have not been reached)

### **6. Methods**

(including the timeline, provide information about your methods used - moorings, deployments, range testing, analysing the data)

### **7. Results**

(relate the results to your aims provided in the initial application including figures and tables if necessary)

### **8. Discussion**

### **9. Outputs**

(conference presentation, public talks, scientific papers, media coverage, etc)

### **10. Acknowledgements**

### **11. References**
