

Material Safety Data Sheet

MOANA Sensor

The battery is neither substance nor mixture but product and having no risk to life and health under normal use or transportation because ingredients of battery is not leaked out by virtue of hermetical sealing with metal case.

This sheet notifies possible risk of our battery under abnormal use but mainly aim to provide information about ingredients, notification of handling and transportation regulations as a useful reference.

Summary

Saft LS17505

Capacity = 12.96W/Hr

Li metal content = 0.9g

Chemistry = LiSOCl₂

Measurements

14.5cm by 4cm

ZebraTech Solar Powered Deck Unit

The battery is embedded within the deck unit and cannot be removed for transport. The deck unit should be turned off for air transport. The battery within the deck unit has no risk to life and health under normal use or transportation.

This sheet notifies possible risk of our battery under abnormal use but mainly aim to provide information about ingredients, notification of handling and transportation regulations as a useful reference.

Summary

LiPoI LP1260100

Capacity = 37W/Hr

Li metal content = 3.0g

Chemistry = Lithium Polymer

Measurements

Deck unit: 27cm by 13cm by 4.375cm

Battery: 10.1cm by 6cm by 1.2cm
